Installation Notes

Install this product according to the installation guide.

Floor support under whirlpool must provide for a minimum of 81 lbs/square foot (395 kg/square meter) loading.

Cast iron whirlpools are extremely heavy, making some drop-in installations difficult. Splitting the deck/surround is recommended if installing into a deck.

Pump/piping protrudes beyond rim (see below).

Hot water supply should be 70% of capacity or greater. Installations will vary.

No change in measurements with drain shown. (K-7148-AF or K-7148M-AF)
