SP/SHSV (04-11) Rev 1

INSTALLATION INSTRUCTIONS

1. Position box between studs to desired height.
2. Secure box to a backing board with screws or nail bracket(s) on box to front of stud(s). In both cases the front edge of the box should be flush with wall material.
3. Cut or punch opening in bottom box if necessary for 2" plastic drain pipe Solvent cement pipe to bottom of box.
4. When installing valves follow your local codes.
5. Install face plate by pushing plate into box until plate is flush against the wall material.
